Title: RIFE-PLASMA FREQUENCY PROTOCOLS for CANCER PATHOGENS & TOXIC CANCERS

Synopsis:

This is a follow-up town-hall series after the initial November 2025 monthly talk titled: **How RIFE TECHNOLOGY Powers PLASMA, PEMF, TENS & ULTRASOUND To Target and Kill Cancer Cells Cost-Effectively**. Together, we now move into the next step as the November 2025 session was naturally well-received. Dr. Bill McGraw is certainly a **beacon of hope**; especially for those who have been unceremoniously sentenced to death with no hope; lingering in a limbo, awaiting the day of reckoning as predicted by oncology.

In the meantime, the most frightening word for the 2020s has certainly been **Turbo Cancer** even though the terminology has not been publicly acknowledged. We appear to have closed an eye and seem to be awaiting an epidemic of **huge proportions** right up the alley. The planned series focuses on some **major cancers** and targets those who want to delve into the finer details of escaping from death-row cancer-jail using **Spooky2**. Once again, such a person has to be strongly determined to **take charge of his/her own health** and make the necessary lifestyle changes to ensure remission is permanent.

About the Speaker:

Dr. Bill McGraw is a multi-disciplinary research scientist and began studying naturopathic medicine because of a healing crisis he was experiencing in 2010. As he could not find a doctor or therapist who could help him, it inspired him to make wellness his passion. Dr. McGraw began using Rife technology to assist people in healing from cancer eight years ago and has developed effective **new cancer healing protocols** with **Plasma Wave Therapy**. Dr. McGraw's main challenge is censorship on major platforms, so he focuses on **educating people** with chronic diseases, helping thousands worldwide to **heal themselves**.

Dr. Bill McGraw, from Pennsylvania earned two degrees from his home state as well as from Alabama (Ph.D.) and then went on to complete a post doctorate fellowship at HBOI at Florida Atlantic University. Dr. McGraw has lived and worked in New Zealand, Australia, South Africa and Panama where he is a resident for 15 years now. Dr. McGraw has spent over 20 years researching the science of alternative health, while healing people from chronic disease. He has published two books, multiple e-publications and conducted hundreds of interviews, seminars and podcasts with some of the biggest names in alternative health over the past decade.

CanSurvive and Its Purpose

CanSurvive is a support and information service for those who are challenged with cancer. CanSurvive provides information and support, as well as services that offers greater awareness of the benefits of holistic, non-invasive cancer therapies, nutrition and diet as well as orthodox

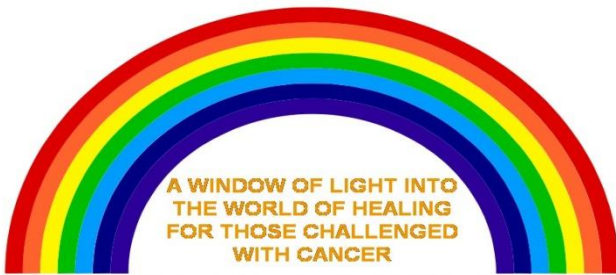

treatments (including what is available and where to access them). It is a window of light into the world of healing where the word “terminal” is a challenge, not a death sentence.
